2024 Student Profile & Treatment Outcomes

How Discovery Ranch Uses Outcomes Data for Continuous Improvement

At Discovery Ranch, we're committed to providing top-quality care for struggling teen boys. We use real-time data, outcome tracking, and regular feedback from students, parents, and staff to guide continuous program improvement. This data-driven approach helps our leadership team make informed, timely adjustments that are carefully monitored to ensure they positively impact each student's journey.

Our commitment to Quality Improvement

Discovery Ranch is deeply dedicated to the continuous improvement of our therapeutic program. This necessitates the real-time measurement of key trends across all operational aspects. Data is continuously collected, compiled, and rigorously analyzed. Furthermore, our leadership team actively seeks feedback through surveys from parents, students, and staff. This vital feedback mechanism allows us to proactively identify areas for enhancement in safety, treatment effectiveness, and the cultivation of a supportive therapeutic environment.

Our ongoing reviews cover critical program elements such as medical support, therapy (individual, group, and family), milieu, nutrition, facilities, academics, parent support, experiential activities, peer culture, psychiatric services, communication, recreation, life skills, and transitional planning.

The Discovery Ranch leadership team continuously reviews this data and feedback, enabling real-time adjustments and program improvements. This dynamic approach ensures our responsiveness to our students' evolving needs and our consistent pursuit of optimal outcomes.

Impact on your family

To help you better understand the impact of the Discovery Ranch program in 2024, this document includes specific data points illustrating the positive outcomes and growth our students have achieved. These key indicators offer a clearer understanding of the transformative impact of our comprehensive and individualized treatment model, designed to support your son's healing and facilitate positive change within your family.

Overview Of Discovery Ranch

Outcomes and Key Findings

Over
1,000
Families Served

20+ Years
in Business

Hear **from the parents** who have been in our program!

98%

98% of parents who's child participated in Discovery Ranch treatment reported **feeling their child was physically safe in the program and would recommend Discovery Ranch to a friend if they had a child needing this level of care.**

Hear **from the students** who have been in our programs!

91%

91% of **Students** reported **feeling physically safe at Discovery Ranch.**

96%

96% of **of students** reported they felt like **Discovery Ranch helped them and their family.**

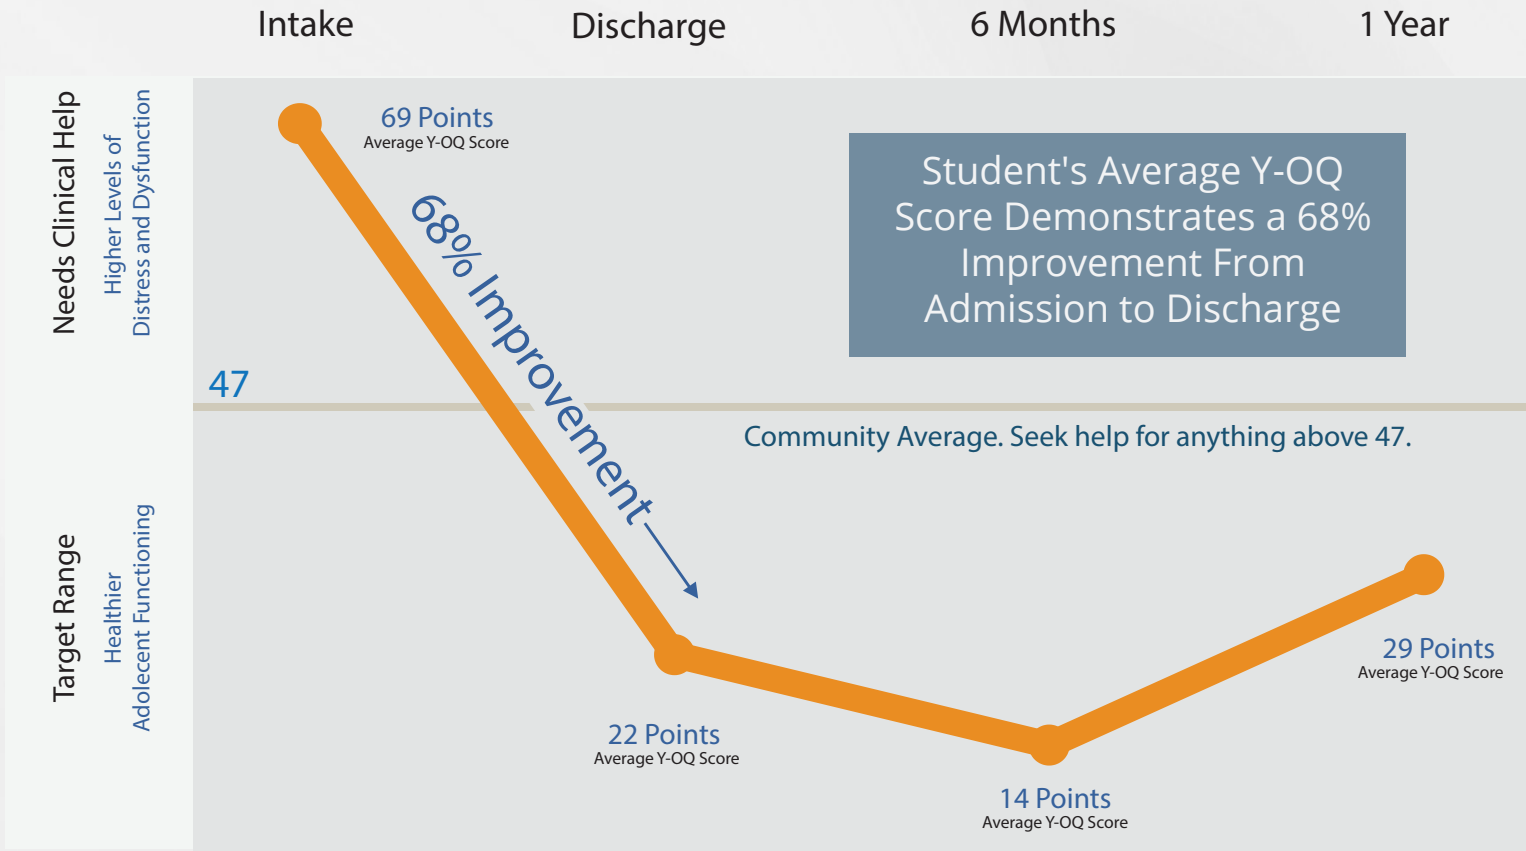

The research methodology includes the administration of an automated survey to all parents at predetermined intervals during treatment for data gathering purposes.

Measurement of Overall Improvement

Youth Outcome Questionnaire (Y-OQ) 2023

The Youth Outcome Questionnaire (Y-OQ) is a tool developed to measure adolescent functioning. The Y-OQ has been validated and normed and is considered useful in measuring the progress of teens who may require outpatient or inpatient treatment. Lower scores mean fewer problems and better functioning. The Y-OQ helps us track improvement directly from their perspective – a vital measure of how they experience their healing journey during and after treatment.

Students complete the Y-OQ at enrollment, discharge, six months, and one year post-discharge. This self-reported data helps us measure progress and long-term impact.

When reviewing Y-OQ scores, it's important to understand that lower scores indicate better emotional and behavioral health. The goal is to see the scores of our students decrease over time. A downward trend reflects meaningful progress as students build coping skills, improve emotional regulation, and move toward overall well-being.

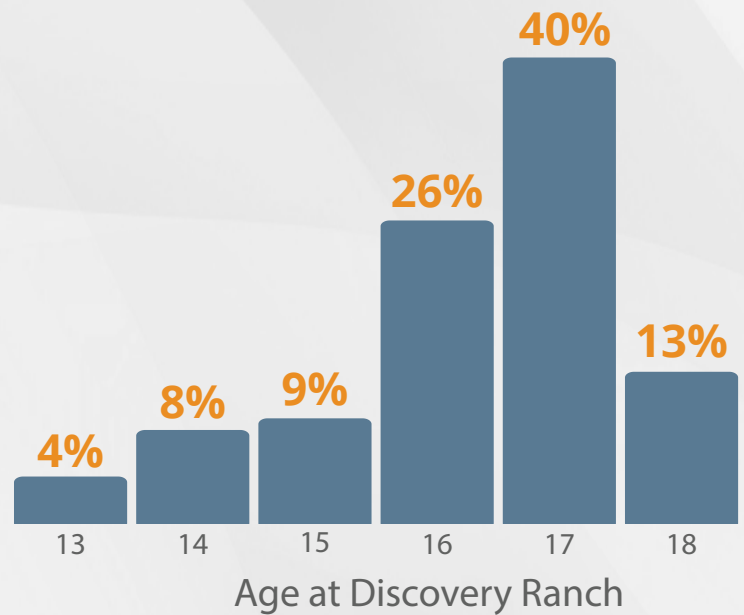

40 Point Improvement and Maintained That Score One Year Later

Discovery Ranch Surpasses Clinical Standard - **A 13 Point Change Is Considered Clinically Significant**

Student Profile

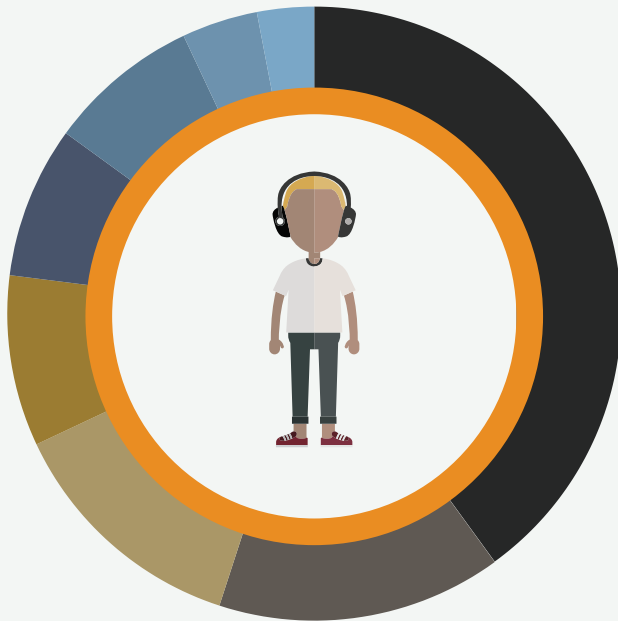

Discovery Ranch is a therapeutic school and residential treatment center designed for **teenage boys who are facing significant emotional and behavioral challenges such as depression, anxious attachment issues, ASD, ADHD, and more.**

Students are typically enrolled between 8 and 12 months, providing ample time for long-lasting change and growth.
